- STAFFING SERVICES

VALUE ADDED SERVICES

Value added services increases the customization of a product and reduces costs by streamlining the finished goods at the end of the supply chain. This allows manufacturers to source inventory from multiple locations and stored at 3PL where all components are assembled and shipped to the consumer or retailer.

Kitting & Bagging

We combine your online orders at the SKU level to ensure they are processed efficiently/accurately.

Bundling

Running a special promotion? New product launch? We can bundle your products together.

Custom Packaging

We know how important your product packaging is; we will make sure your packaging looks perfect every time. We also can help you source packaging with our providers.

Quality Inspection & Testing

Issues can arise during the transportation of your products. To ensure your product's quality we will test, clean, inspect, contain, repack your products when they arrive at our warehouse.

Light Assembly

As orders come in, your products are assembled in final form in our warehouse.

Co-packing & Labeling

Use custom labeling, packaging, inserts or co-packing to deliver the best branded experience to your customers.

Display Building

Your products need to be represented perfectly in the retail environment. We will store and build your displays to spec.

Automated Technology

The value-added line uses automated machine vision/artificial intelligence technology as a quality assessment system. This adds another layer of accuracy and speed to our operations.
